DETAILED ACTION

Allowable Subject Matter

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: in the environment of a drill string used in the transmission of data the closes prior art Boyadjieff '887 fails to teach or suggest a conductive layer covering a drill string insulating layer the layer of conductive material terminating in a conductive ring which is electrically connected to the conductive layer, an additional layer of electrical insulating material covering the inside face of the electrically conductive layer, the additional insulating layer not covering the inside faces of the rings which are in contact with the drilling mud.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fontenot '609, Meadows '203 and Jeter '678 disclose the use of using the drill string and an conductive material within the drill string as transmission paths.
